Address Book

User Manual v0.3

Table of contents

Install your addressbook

Minimal installation

1) Download from sourceforge: http://php-addressbook.sf.net/latest.html

2a) Extract „addressbook.sql"

2b) Apply to your database (e.g. with phpmyadmin)

3a) Upload all files to your website, e.g. to „yourdomain.com/addressbook"

3b) Edit the « config/cfg.db.php » according to your providers information.

```
$dbname         = "test";
$dbserver       = "localhost";
$dbuser         = "root";
$dbpass         = "";
```

Additionnal security

Setup Users

1) Edit « config/cfg.user.php »

2) Add yourself as a « root » user

```
$userlist['admin']['pass'] = "secret";
$userlist['admin']['role'] = "root"; // used to call "/diag.php"
```

3) Add somebody else as a global editor

```
$userlist['somebody']['pass'] = "secret-too";
```

4) Add « view » as a « readonly» user

```
$userlist['view']['pass'] = "secret-light";
$userlist['view']['role'] = "readonly";
```

Setup read-only IP-Ranges

1) Edit « config/cfg.user.php »

2) Add your company's IP-range (or Proxy IP-addresses) as editors

```
$iplist['169.168.1.*']['role']     = "editor";
```

3) OR just add your company « read only »

```
$iplist['169.168.1.*']['role']     = "readonly";
```

Setup users in database

You may manage your users in the database too , just uncomment the « usertable » line:

```
$usertable = 'user';
```

Notice : This is not an officially supported feature, as there are not yet any tools available. If you use it, just don't forget to encode the password mit MD5.

Additionnal integrations

iPhone / Android integration

1. Copy the content of « .htaccess_for_mobile_sync » to your «.htacces
2. You may change the path to your addressbook

```
Options +FollowSymlinks
RewriteEngine on
RewriteBase /

RewriteRule .* - [E=HTTP_MS_ASPROTOCOLVERSION:%{HTTP:Ms-Asprotocolversion}]
RewriteRule .* - [E=HTTP_X_MS_POLICYKEY:%{HTTP:X-Ms-Policykey}]
RewriteRule .* - [E=HTTP_AUTHORIZATION:%{HTTP:Authorization}]

RewriteRule ^Microsoft-Server-ActiveSync(.*)$ addressbook/z-push/index.php?%{QUERY_STRING}
```

3. Check if everything installed by calling this URL :
   - **Fehler! Hyperlink-Referenz ungültig.**
4. You will be asked for a vaild user and password:

tbd

5. A screen looking like this should appear, if everything looks ok:

tbd

Facebook / Twitter / Google integration

Tbd, coming soon.

Look & feel changes

Disable Google-Maps

You may for security reasons disable Google-Maps, as all addresses are geocoded once at Google :

```
// $google_maps_keys[''] = "";
```

Rows displayed on « index.php »

You may display other columns :

```
$disp_cols
  = array( "select"
         , "photo"
         , "last_first"
         // , "lastname"
         // , "firstname"
         , "address"
```

```
        , "all_emails"
        // , "email"
        , "all_phones"
        // , "telephone"
        // , "home"
        // , "mobile"
        // , "work"
        // , "fax"
        , "edit"
        , "details"
        );
```

Improve the addressbook

Fix your language

Got to the « include » directory and search your translation.xx.php. If you have any questions, feel free to post it to the forum.

Fix your address guess

Fix your layout

Add your feature

If you have any good contribution, feel free to post it to the forum.

Access your addresses

Over the web
tbd

Over the mobile phone
- e-Mail : <any@yourdomain.com>
- Server : <yourdomain.com>
- Domain : [empty]
- User : same as web access
- Password: same as web access
- SSL : Depending on your server configurtation

iPhone
Setup account => Mail => Exchange => <yourdomain.com> (Disable SSL not available)

http://simultaneouspancakes.com/Lessons/2010/06/24/connecting-an-iphone-4-to-exchange/

Android
http://portal.smartertools.com/KB/a1148/setup-an-android-phone-or-tablet-for-exchange-activesync.aspx

Over the database interface
Vw_addressbook

Vw_addressbook_deleted

Over e-Mail
tbd, coming soon
